

AMERICANS FOR NURSING SHORTAGE RELIEF

November 3, 2009

The Honorable David R. Obey
Chairman
Committee on Appropriations
United States House of Representatives
Washington, D.C. 20515

The Honorable Jerry Lewis
Ranking Member
Committee on Appropriations
United States House of Representatives
Washington, D.C. 20515

Dear Chairman Obey and Ranking Member Lewis:

The undersigned members of the ANSR (Americans for Nursing Shortage Relief) Alliance urge your continued support of at least **\$263.4 million** in FY 2010 for the ***Title VIII – Nursing Workforce Development Programs*** of the ***Public Health Service Act***.

The Title VIII programs, administered by the Health Resources and Services Administration, provide the main federal funding for nursing education, practice, and retention, aimed at maintaining a supply of nurses essential to achieving the nation's goal of ensuring access to affordable, high-quality health care for all. Today's shortage of appropriately prepared nurses – although eased somewhat in various locales during the recent recession – still outpaces the level of federal investments in the Title VIII Nursing Workforce programs necessary to meet the nation's health care demands. This persistent workforce imbalance exacerbates nurse faculty scarcities in the education infrastructure, preventing too few eligible people from entering the profession at the rate the nation requires for our growing health care needs. Absent faculty to educate our future nurses, the shortage cannot be resolved and health disparities, inflated costs, and poor quality of health care outcomes likely will deepen.

Having a sufficient nurse workforce to meet the demands of a highly diverse and aging population is an essential component to reforming our health care system as well as improving the health status of the nation and reducing health care costs. These systemic workforce problems also challenge other aspects of our future as the link between health care and our nation's economic security and global competitiveness is undeniable. Nurses everywhere are well aware of the fiscal dilemma facing the nation today, and we thank the House for its astute efforts to provide for growing health care requirements by addressing nurse and nurse faculty workforce deficits.

The ANSR Alliance stands ready to work with you to advance evidence-based, cost-effective programs and policies that hold the most promise to properly address and mitigate the complex factors contributing to the current and expected nurse and nurse faculty shortages.

Sincerely yours,

Academy of Medical-Surgical Nurses
